

ECO-FRIENDLY

Paper & Card Food Containers

Fully recyclable, greaseproof and microwavable for convenience in any kitchen environment

Chip Cone

STOCK CODE	DESCRIPTION	QTY
CCCN1000		1000

Fish & Chip Box

STOCK CODE	DESCRIPTION	QTY
CFCT0002	Medium	150

Small Fish & Chip Tray

STOCK CODE	DESCRIPTION	QTY
CFCT0001	22x11.5x4.5cm	250

Chip Scoop

STOCK CODE	DESCRIPTION	QTY
CCS01000	Small	1000
CCS01002	Medium	1000
CCS01001	Large	1000

Burger Box

STOCK CODE	DESCRIPTION	QTY
CWBB0500	Whopper	500

Pizza Slice Tray

STOCK CODE	DESCRIPTION	QTY
CPST0001	17.2x18cm	1000

Meal Box

STOCK CODE	DESCRIPTION	QTY
CBSS0250	Standard	500
CBSL0250	Large	250

Hot Dog Sleeve

STOCK CODE	DESCRIPTION	QTY
DCCP2000	Standard	1000
CHDS0100	Large	1000

Clamshell Box

STOCK CODE	DESCRIPTION	QTY
CBCS0001	10.8x10.8x7cm	250
CCBB0005	13.5x12.5x7.5cm	250

Pizza Slice Tray

STOCK CODE	DESCRIPTION	QTY
CPST0002	White	1000

Plain White Pizza Box

STOCK CODE	DESCRIPTION	QTY
CFPB0010	25.4cm (10")	100

Corrugated Brown Pizza Box

STOCK CODE	DESCRIPTION	QTY
CFPBB009	23cm (9")	100
CFPBB012	30cm (12")	100
CFPBB014	35.5cm (14")	50

Burger Box

STOCK CODE	DESCRIPTION	QTY
DMCC0005	9x9x5cm	500
DMCC0004	7x7x5cm	500

Chip Cup

STOCK CODE	SIZE	QTY
DMCC0003	5x7.9cm	500

Noodle Box

STOCK CODE	SIZE	QTY
DMCC0002	7.8oz	500

Pasta Box

STOCK CODE	SIZE	QTY
DMCC0001	7.8oz	500

SINGLE USE PLASTICS ECO-FRIENDLY

Alliance is a responsible supplier

Alliance acknowledges and recognises the impact single-use plastics have on the the global and local environment, and is committed to continuous environmental improvement wherever possible.

Single-use plastics, or disposable plastics, are used only once before they are either thrown away or recycled. These include products such as straws, coffee cups, coffee stirrers, water cups and most food packaging.

Although plastic will not biodegrade, (decompose into a natural substance like soil), it will break down into tiny particles after many years. In the process of breaking down, it releases toxic chemicals (additives that were used to shape and harden the plastic) which make their way into our food and water supply.

These toxic chemicals can be found in our bloodstream. And the latest research has linked them to cancer, infertility, birth defects, impaired immunity and many other ailments.

We produce hundreds of millions of tons of plastic every year, most of which cannot be recycled. It's obvious that we need to use less plastic and move towards sustainable products, and come up with technology that recycles plastic more efficiently.

Alliance complies with all national environmental legislation, and we strive to make sure that the products we supply to our customers have been manufactured to demonstrate environmentally sound methods and policies.

Plastic pollution facts and stats

Most of the plastic waste in the UK doesn't actually end up in our oceans, but a lot is disposed of in our environment – burned or buried in landfill sites. People are increasingly worried about this and its impact on nature, and they're right to be. 79% of the plastic waste ever created is still in our environment. We are leaving a legacy of plastic waste on our planet that will take years to put right.

Despite a huge rise in recycling rates over the past few years, there is a big difference between what we are recycling and what we could be. This is the recycling gap. We need to close it.

More and more people are recycling but we still only recycle 58% of our plastic bottles – that's a 42% gap. Plastic bottles are accepted for recycling by 99% of local councils in the UK. We only recycle 32% of the plastic pots, tubs and trays we buy and these are widely collected for recycling.

It all adds up to plastic being needlessly burned or dumped in landfill every year. Some of that plastic ends up polluting our environment. We all do our bit to recycle, but we can still do more.

Plastic pollution can now be found on every beach in the world, from busy tourist beaches to uninhabited, tropical islands nowhere is safe.

Scientists have recently discovered microplastics embedded deep in the Arctic ice.

In 1950, the world's population of 2.5 billion produced 1.5 million tons of plastic; in 2016, a global population of more than 7 billion people produced over 320 million tons of plastic. This is set to double by 2034.

Every day approximately 8 million pieces of plastic pollution find their way into our oceans.

There may now be around 5.25 trillion macro and microplastic pieces floating in the open ocean. Weighing up to 269,000 tonnes.

Plastics consistently make up 60 to 90% of all marine debris studied.

Approx 5,000 items of marine plastic pollution have been found per mile of beach in the UK.

Over 150 plastic bottles litter each mile of UK beaches.

Recent studies have revealed marine plastic pollution in 100% of marine turtles, 59% of whales, 36% of seals and 40% of seabird species examined.

100,000 marine mammals and turtles and 1 million sea birds are killed by marine plastic pollution annually.
